SUMMARY

Fourth-year BS Computer Science student at De La Salle Lipa with hands-on experience in full-stack web development and embedded systems. Collaborated on a point-of-sale web application and Second Vision, an offline assistive wearable designed to improve hazard awareness for visually impaired users. Completed the Meta Front-End Developer Professional Certificate, and currently expanding back-end development skills while building a personal project. Seeking opportunities to apply technical skills, further develop professionally, and contribute to meaningful projects.

EDUCATION

De La Salle Lipa - Lipa, Batangas *2023–Expected 2027*
BS Computer Science | Cumulative GPA: 3.30/4.00

EXPERIENCE

Second Vision: Smart Glasses for the Visually Impaired – IoT & QA Engineer *2026–Present*

- Co-developed an offline wearable assistive device that detects hazards and delivers audio and vibration alerts; developed C++ firmware for ESP32-C3 PWM motor control via UART from a Raspberry Pi 5 and BMI160-based turn detection via I2C.
- Owned the technical test plan covering 108 unit, integration, system, and alpha test cases, all passed; collaborated through GitHub feature branches and refined the prototype using feedback from four visually impaired reviewers.
- The device sustained 29.6 FPS with both AI models running and 3.64+ hours of battery life, evaluated by 25 legally blind participants (mean SUS: 59.1).

Sobre POS: Point-of-Sale Web Application – Full-Stack Developer *2026*

- Built the POS screen, shopping cart, checkout flow, and mobile cart drawer using React, TypeScript, and Tailwind CSS; implemented QR/barcode scanning with cooldown logic to prevent duplicate item entries.
- Built Express API endpoints for sales processing and inventory QR code scanning, and implemented a Supabase (PostgreSQL) database function for automatic invoice number generation.

COMPETITIONS & RECOGNITION

- **DICT Philippine Startup Challenge XI: Regional Champion** – Region IV-A CALABARZON *(October 2026)*; qualified for the Cluster-Wide Competition *(November 2026).*
- **BAYANI Lab** – Selected as one of the Top 3 teams among 10 finalists *(October 2026)*; selected to pitch at YABONG 2026 – 5th PH Lifelong Learning Conference *(December 2026)*, competing for final placement.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript (ES6+), TypeScript, Python, C++, SQL, HTML5, CSS3
- **Web Development:** React (Hooks, Context API, React Router), Tailwind CSS, Bootstrap, Node.js, Express, REST APIs, Responsive Design
- **Databases & Tools:** Supabase (PostgreSQL), MongoDB, Git, GitHub, VS Code, Vite, npm, Figma, Linux Command Line
- **Embedded Systems & Testing:** Raspberry Pi 5, ESP32, UART, I2C, PWM, Unit, Integration and System Testing

CERTIFICATIONS

- Meta Front-End Developer Professional Certificate – Coursera *(2026)*

SEMINARS & TRAININGS

- Universiti Teknologi PETRONAS (UTP) Immersion Program *(2026)* — Machine Learning and AI Seminar; Design Thinking Workshop (UResearch Case Study); Quality Inspection with Computer Vision Seminar
